EDUCATION

August 2021 – August 2025

B.S. in Computer Science & Minor in Interactive Media and Game Development,
Worcester Polytechnic Institute

PROFESSIONAL EXPERIENCE

ICT INTERN, BETTING GAMING & LOTTERIES COMISSION SEPTEMBER 2025 - PRESENT

- Developed a WordPress-based intranet, replacing a legacy Drupal system to improve usability and internal workflows.
- Built and configured a WAMP development environment to support efficient local development and testing.
- Developed dynamic UI components using Elementor, custom CSS, PHP and JavaScript for announcements and internal content.
- Integrated backend data workflows using WP Data Access with role-based content management.
- Contributed to UI/UX implementation and internal IT operations, including Jira service desk support and process mapping.

ADVANCING BLACK PATHWAYS FELLOW, JPMORGAN CHASE & CO. JUNE 2023 - AUGUST 2023

- Assessed a company's problem and proposed actionable solutions during a Business Sprint Project, resulting in clear strategic recommendations
- Developed attack and defence strategies for virtual robots using Robocode, strengthening algorithmic robustness and enabling more consistent success in competitive simulations
- Developed a full-stack application through a tech primer, implementing front-end and back-end components to produce a working MVP that provided me with hands on experience

IT DEPARTMENT INTERN, APPLIANCE TRADERS LIMITED JAMAICA JULY 2022 - AUGUST 2022

- Provisioned multiple desktops and laptops for new hires, ensuring seamless onboarding
- Delivered effective desktop support and software installation across multiple departments, streamlining IT operations and boosting end-user productivity
- Integrated new systems into the corporate domain and resolved technical issues promptly

PROJECTS

STICK A PIN | Node.js, Express, MongoDB, Passport.js, Vercel - https://stickapin.app/

- Built and launched a full-stack task management platform with board and calendar views for workflow organization.
- Implemented secure authentication (sessions, OAuth, email verification, password reset).
- Designed RESTful APIs and data models using Node.js, Express, and MongoDB (Mongoose).
- Developed user-focused features including task CRUD, focus sessions, and notifications.
- Applied security best practices (CSRF protection, rate limiting, secure cookies, validation) and deployed via Vercel.

BOSTON FREEDOM TRAIL WEB APP |React, Next.js, MongoDB, Leaflet- https://freedom-trail-tour.vercel.app/

- Collaborated on a mobile-first React and Next.js application guiding users along the Boston Freedom Trail
- Designed user authentication pages, implemented a badge system and contributed to live location tracking using Leaflet.
- Integrated Google Maps API and MongoDB for data storage and business listing
