SUMMARY

Software developer focused on full-stack product engineering, secure backend workflows, and user-centered web applications. Experienced with React, Next.js, Node.js, MongoDB, WordPress, authentication workflows, database-backed features, and reusable components.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C, C++, SQL, HTML/CSS, PHP

Frontend: React, Next.js, Tailwind CSS, JavaFX, Elementor, Spectra, Leaflet, Google Maps API

Backend / Databases: Node.js, Express.js, MongoDB, Mongoose, PostgreSQL, Passport.js, WP Data Access

Game / Interactive: Unreal Engine 5, Blueprints, Behavior Trees

Tools: Git, GitHub, Jira, GitHub Projects, Docker, Vercel, Figma, WAMP, Gradle, IntelliJ, Eclipse, WebStorm

Core Competencies: Full-Stack Engineering, REST APIs, Secure Authentication, Database Design, User-Centered Design, Workflow Systems, Agile/Scrum, Technical Documentation

PROFESSIONAL EXPERIENCE

ICT Intern | Betting Gaming & Lotteries Commission | September 2025 - Present

- Supported a Drupal-to-WordPress intranet migration by building four responsive pages for a 121-user organization across 9 departments.
- Built 7 reusable and interactive intranet components and supported department-based page structures across 9 departments.
- Improved maintainability through reusable card components and documented WordPress features in a local WAMP environment.

Advancing Black Pathways Fellow | JPMorgan Chase & Co. | June 2023 - August 2023

- Assessed a company problem during a Business Sprint Project and presented actionable recommendations to peers, mentors, and senior company leaders.
- Built a full-stack MVP during a technical primer and developed Robocode attack/defense strategies to strengthen algorithmic thinking.

IT Department Intern | Appliance Traders Limited Jamaica | July 2022 - August 2022

- Provisioned and configured desktops and laptops for new hires, supporting smooth onboarding and device readiness.
- Delivered desktop support, software installation, domain integration, and troubleshooting across departments.

SELECTED PROJECTS

StickAPin | Node.js, Express, MongoDB, Passport.js, Vercel | <https://stickapin.app/>

- Built and launched a full-stack task management platform for users dealing with anxiety, ADHD, and decision paralysis.
- Designed RESTful APIs and MongoDB/Mongoose models for task, board, calendar, and account workflows.
- Implemented secure account workflows and productivity features including OAuth, email verification, password reset, CSRF protection, rate limiting, task CRUD, focus sessions, and notifications.

Plates of Power / Project Boca | Unreal Engine 5, Blueprints, Behavior Trees

- Collaborated on a 20-person, year-long WPI Major Qualifying Project to build a 3D Unreal Engine 5 roguelite focused on dynamic combat, narrative progression, and cultural representation.
- Built enemy AI and combat-facing systems using Blueprints, Behavior Trees, AI perception, and NavMesh-based movement.

Hospital Kiosk Web Application | React, Tailwind CSS, PostgreSQL, Auth0, Docker, AWS

- Served as Assistant Lead Software Engineer on a client-informed Software Engineering class project for a hospital kiosk web app supporting navigation, service requests, and employee workflows.
- Implemented pathfinding inputs, service request forms, map controls, success notifications, About/Credits pages, and Agile workflows using GitHub, Jira, Docker, and React components.

Boston Freedom Trail Web App | React, Next.js, MongoDB, Leaflet | <https://freedom-trail-tour.vercel.app/>

- Built mobile-first React/Next.js features including authentication pages, badges, live location tracking with Leaflet, Google Maps API integration, and MongoDB-backed location data.

EDUCATION

Worcester Polytechnic Institute | Worcester, MA

August 2021 - August 2025

B.S. in Computer Science; Minor in Interactive Media & Game Development
